

PropVision AI - Project Progress Report

Generated: April 14, 2026

Job ID: 1f811669-ab62-4290-81dc-4fbb3cce00c7

Executive Summary

Current Critical Issue (P0)

UNRESOLVED: Vision Intel Summary not displaying on PlayerDetailPage.jsx frontend

Root Cause: `mlb_master_hub_2026` collection has 0 documents - never populated

Impact: MLB Vision Intel features are non-functional despite backend code being in place

Original Problem Statement

Restructure the React/FastAPI betting app to a 100% Local-First Database Model, integrating multi-sport support (NBA/MLB) and an exact MLB/NBA evaluation system.

Core Requirements

- Implement BallDontLie (BDL) API modifiers precisely
- Establish automated daily prop capture
- Integrate Google/Apple OAuth

- Implement Stripe for payments
- Refactor Dashboard.jsx
- Implement "High-Friction Ensemble" MLB MLR model
- Display Vision Intel Suite instantly via Rolling Cache Architecture

Architecture Overview

Component	Technology	Status
Frontend	React with Shadcn/UI	Running
Backend	FastAPI (Python)	Running
Database	MongoDB	Connected
ML Models	XGBoost (64 features)	Trained
Cache	Rolling Cache Architecture	Partial

Completed Work

1. MLB Physical Engine v2.1

- 64-feature XGBoost model built and trained
- 5 models: hits, total_bases, rbis, runs, pitcher_strikeouts
- File: `/app/backend/services/mlb_physical_engine.py`
- Models: `/app/backend/models/mlb_physical/*.pkl`

2. Ferrari+ Tier System v4

Tier	Sharp Price Window	Description
Safe Haven	≤ -250	Ultra-high probability locks
Front Lines	-245 to -115	Strong favorites with edge

War Zone	-114 to +500	Value plays and longshots
----------	--------------	---------------------------

3. Global Variance Synchronization (L20 Stabilized Shield)

Layer	Metric	Window	Purpose
Performance	Hit Rate	L10	Current "Heat"
Risk	CV/Sigma	L20	"Stabilized Shield"

4. Rolling Cache Architecture v2.0

- APEX-ONLY CACHING - No empty shell props
- Format Normalization Layer
- Cache Integrity Checking
- Files:
 - `/app/backend/services/rolling_cache_manager.py`
 - `/app/backend/services/normalize_to_intel_mapping.py`
 - `/app/backend/services/filter_logic.py`

5. MLB Scout Intel Badges

- 8 MLB-specific badges integrated
- Pure Contact, High-Heat Trap, Workhorse, Barrel Master
- Wind Blowing Out, Cold Zone, BvP Dominator, Split Advantage

6. Audit Documentation

- `/app/frontend/public/mlb_mlr_strict_audit.json` - 64-feature documentation
- `/app/memory/FERRARI_METHODODOLOGY.md` - Complete methodology
- `/app/memory/FERRARI_BUILD_GUIDE.md` - Technical specification

Database Status

Collection	Documents	Status
------------	-----------	--------

nba_master_hub_2026	326	Populated
mlb_master_hub_2026	0	EMPTY - CRITICAL
dg_cached_board	66	Active
dg_live_props	1439	Active

API Endpoints

Ferrari Tiers

- GET /api/v3/ferrari/safe-haven
- GET /api/v3/ferrari/front-lines
- GET /api/v3/ferrari/war-zone
- GET /api/v3/mlb/ferrari/safe-haven
- GET /api/v3/mlb/ferrari/front-lines
- GET /api/v3/mlb/ferrari/war-zone

Intel Cache

- GET /api/v3/intel-cache/nba
- GET /api/v3/intel-cache/mlb
- GET /api/v3/intel-cache/status
- POST /api/v3/intel-cache/refresh/{sport}

Pending Tasks

Priority	Task	Status
P0	Fix Vision Intel display on PlayerDetailPage	Blocked - No MLB Hub Data
P0	Populate mlb_master_hub_2026 collection	Not Started

P1	Google OAuth integration	Pending
P1	Stripe payments integration	Pending
P2	Wind Tunnel weather API	Pending
P2	Refactor Dashboard.jsx	Pending

Files Reference

Backend Services

```
/app/backend/services/
├── mlb_physical_engine.py      # MLR model (64 features)
├── mlb_oracle_apex_service.py  # Elite tier orchestrator
├── rolling_cache_manager.py    # Cache management
├── filter_logic.py            # Strict Board Lockdown
├── normalize_to_intel_mapping.py
├── mlb_tier_service.py
├── mlb_badge_system.py
└── mlb_deep_ingestion.py      # Hub population (NOT RUN)
```

Frontend Components

```
/app/frontend/src/components/dashboard/
├── PlayerDetailPage.jsx      # Vision Intel display (BROKEN)
├── Dashboard.jsx
└── PickCard.jsx

3rd Party Integrations

Service	Purpose	Status
Gemini 3.1 Flash-Lite	AI Context Analysis	Active (Emergent Key)
The Odds API	Sharp Market Data	Active (User Key)
BallDontLie API	Game Logs & Stats	Active (User Key)

Changelog Summary

April 14, 2026

- Implemented Strict Board Lockdown v2.0 (Ferrari Tiers Only)
- Created filter_logic.py for surgical enrichment
- Attempted Vision Intel cache merge fixes
- Discovered mlb_master_hub_2026 is empty (CRITICAL)

April 10, 2026

- MLB Scout Intel Badges integrated
- Sport-aware Vision Intel Suite
- MLB stats display fix (L5/L10/Avg)

April 2, 2026

- Ferrari v4 Pipeline - Final Architectural Lock
- 5% Absolute Edge requirement
- Median Anchor implementation
